Product description:

Portable power drive threader

Features

- Specially designed for maintenance work and use in confined spaces thanks to compact head design.
- Height of threading area is the smallest in the market.
- Electronic reversal of the direction of rotation to reduce weight and improve portability
- Forged steel pipe holder, recommended.
- Glass reinforced plastic case to protect the motor
- Robust and resilient aluminium body.
- Operating switch: non-blocking
- Only threader in the market with helicoidal gear transmission system.

TECHNICAL DATA

Capacity: 1/2" - 1.1/4"

Current: 230V

110V

For threading of: BSPT - NPT

Weight: 4.9 kg
